

Student Worksheet Packet

Horizons

Mathematics K

This packet contains the worksheets necessary for one student in the ***Horizons Mathematics K*** curriculum. It is made available for anyone not being able to or not wanting to use the reproducible masters provided in the Teacher's Guide. Worksheets used more than once will need to be photocopied for that purpose or you can have the student work the problems and write answers on another sheet of paper.

There is approximately one worksheet every few lessons. This packet contains a list of all worksheets and the lessons with which they are associated.

Worksheets provide additional or remedial work for student(s). Some worksheets become manipulatives for the student(s).
